

PureStream™ Carbon Prefilter

With the ever-increasing amount of foreign contaminants found in tap water, it is becoming more necessary to filter the water before filling your pool or spa. Our carbon prefilter removes impurities including iron, lead and other heavy metals, chloramines, hydrogen sulfide, color, and many other contaminants, even odor-causing organics. Higher quality fill water reduces demand on your sanitizer and results are often seen immediately. Drinking water quality, so you'll find other uses around the home, including spot-free car washing. Easy to use, attach the filter to the end of any garden hose and begin the fill.

Features:

- Easy to use, attach to any standard garden hose;
- Extends your pool or spa filter life;
- Removes iron, lead and other heavy metals, chloramines, hydrogen sulfide, color, and many other contaminants, even odor-causing organics;
- Reduces demand on your sanitizer.

Directions:

- Attach to any standard garden hose;
- Turn on water and flush filter for 20-30 seconds;
- Turn off the hose when pool or spa is filled to appropriate levels;
- Replace when filter is full and restricts water.
